Convulsion, Fits, then Epilepsy.

Dr. Miles' Restorative Nervine has been so successful in curing these brain-wrecking diseases that there is every reason to believe that even the most hopeless cases can be

benefited, if not fully restored. We will be pleased to refer any one thus afflicted to many who now enjoy the blessing of health, after years of hopeless suffering.

"I have a son that end brain fever when two years old, followed by fits of the worst type, and he was pronunced incurable. I spent hundreds of dollars for him, without relief. After about fifteen years he became so had that we sent him to Longeliff hespital for the insane, at Logansport, Ind. He was there nearly three years, but he continued to grow worse, so we brought him home July 30, 1992, in an awful condition. He had lost his mind almost entirely. He hardly knew one of the family; could not even find his bed; was a total wreck. He had from 5 to 10 fits a day. We were ursed to try Dr. Miles' Nervine, and before the first bottle was used, we could see a change for the better. We have given it to him ever since, and he has had but two very light spells since last August, 1993, and then he was not well other ways. We prenounce him cured, as he can work and go anywhere. If any one wishes to ask any questions concerning this, they are at therety to do so."

E. H. BUNNELL Lincoln, Ind.

SMALL PILL. SMALL DOSE. SMALL PRICE

CHEAP SEPARATORS

It is universally recognized that in point of goodness DE LAVAL Separtors stand alone. Hence the claim of imitating machines to cheapness.

There is nothing else perhaps in which "cheap" means as much as in Cream Separators. The really "cheap" machine is not that which costs

least, but that which gives the most capacity, recovers all the butter-fat, produces the best cream, runs easiest, and will last longest

These are the qualities which represent recognized goodness in the DE LAVAL, and in any and all of which no other Separator is comparable.

Most "cheap" Separators are in a class with rhinestones, "dollar" watches, and other trashy imitations of the real thing. But worse than all that, they WASTE butter-fat every time they are used, and so would be dear as a gift.

The genuinely cheap separator is the GOOD separator, which soon SAVES instead of LOSES its cost, and may be bought on such easy terms as to actually PAY FOR ITSELF during the first year of use, and then be good for another twenty years more of clear profit.

Facts, figures and reasons, to be had for the asking
